## WORK EXPERIENCE

### Manual Tester

Remotasks – United States                          October 2023 – Present

Responsible for manual testing specializing in chat bot development.
- Developed and implemented comprehensive test plans outlining scenarios and test cases specific to chat bot functionalities.
- Conducted hands-on testing of the chat bot, meticulously assessing user interactions, responses, and overall performance.
- Identified and documented software defects, ensuring a thorough understanding of potential challenges and collaborated with the development team for effective resolution.
- Worked closely with developers, product managers, and other stakeholders to communicate testing progress, address issues, and contribute to the overall improvement of the chat bot.
- Created detailed test documentation, including test cases, test scripts, and test reports to maintain a comprehensive record of testing activities.
- Performed regression testing to ensure that new developments do not adversely affect existing chat bot functionalities.

### Apprentice Front End Developer

INDASTRIAL GLASS SOLUTION – Kyiv, Ukraine          January 2023 – April 2023

Responsible for maintaining and enhancing an already existing web application.
- Collaborated with the development team to identify and address bugs, issues, and performance improvements in the application's front-end codebase.
- Assisted in implementing new features and functionalities based on user feedback and business requirements.
- Worked closely with UX/UI designers to ensure consistency and usability across the application.
- Conducted thorough testing and debugging to ensure the application's stability and optimal performance.
- Actively participated in code reviews and provided feedback for code quality and best practices.

- Experience in responsive design to ensure optimal user experiences across different platforms and screen sizes.
- Experienced with Figma for design prototyping.
- Proficient with implementing responsive designs using Bootstrap.
- Familiarity with version control systems such as Git for collaborative development and code management.
- Ability to work with APIs, such as REST APIs, and integrate them into web applications to enhance functionality.
- Proficient in MS Office, with demonstrated ability to pick up new tools.
- Strong problem-solving skills and attention to detail, ensuring clean, efficient, and well-structured code.
- Excellent verbal and written communication and collaboration abilities, thriving in team-oriented environments.
- Continuous learner, always keeping up-to-date with the latest industry trends and technologies;
- Committed to delivering exceptional user experiences through clean, efficient, and responsive code. Eager to join a dynamic team and continue to learn and grow in a professional environment.

## WORK EXPERIENCE

### Apprentice Front End Developer

HARWIND – Kyiv, Ukraine                    January 2022 – April 2022

Collaborated with a team of developers to create a new page for an existing web application.

- Worked with company's designers, product managers and developers to achieve design goals and directly helped advance organizations design system documentation;
- Played an integral role in the development process of an additional web page of an existing web application, working closely with senior developers to implement front-end functionalities using HTML, CSS, and JavaScript;
- Assisted in conducting code reviews and debugging to ensure the quality and efficiency of the web page;
- Contributed to the design and layout of the page, applying UI/UX principles to enhance user experience and navigation;
- Actively participated in team meetings and brainstorming sessions, providing valuable insights and suggestions for improving the overall functionality and aesthetics of the application.
